

Berger Paints India Gets Runner-Up Spot In The Coveted ICC Water Awards 2022

Berger Paints India is proud to announce that we have been recognised as a Runner-up in the prestigious ICC Water Awards 2022 in Industrial Water & Waste Water Management.

Indian Chamber of Commerce (ICC) is an eminent consortium of business organisations in Eastern and Northeastern India. Several large corporate groups in the country and overseas are affiliated with this organisation.

This is the 1st edition of the ICC Water Awards that recognises excellence in the sphere of the water intensive industry for the year 2021-2022.

The award evaluates an organisation's concern towards

water management by conservation of water, saving energy towards water intensive activities, optimising fresh water usage by various technologies used for water treatment, wastewater treatment and recycling process through adequate measures as a corporate commitment towards ensuring that the people and planet are adequately protected from the adverse effect of wastewater and to curb demanding water needs.

As an organisation, at Berger Paints India, we are truly committed to our environmental responsibilities. Water conservation is of utmost importance to us and we pledge to continue and excel in our sustainable approach toward Industrial water management.
